I/O Concepts Delivers Unique Enterprise Remote Connectivity Solution

I/O Concepts Announces a new Secure Access Management System (SAMS), which helps organizations simplify and secure access to complex, multi-platform computing environments.

Bellevue WA. – (May, 2006) – I/O Concepts, Inc., a company dedicated to applying innovative software engineering to help organizations reduce costs, announces availability of the Secure Access Management (SAMS). This revolutionary, flexible, multi-platform access solution allows organizations to improve security of remote access while providing a single access point for all of their enterprise computing systems.

“I believe that we have created an entirely new and revolutionary type of product” said Michael Millspaugh, President of I/O Concepts. “Our customers asked us for an easy way for their clients to be able to access their computing systems. The SAMS product is a result of that request and we are proud to deliver a valuable solution that is highly flexible, readily scalable, and easy to use.”

The SAMS is a revolutionary solution that supports a wide variety of connectivity types and protocols, allowing it to seamlessly integrate with all major computing platforms and devices. IBM Mainframe, iSeries, Linux and Unix platforms are supported. Companies can now use the SAMS product to allow people with different responsibilities in the company to access their companies computing resources with a single SSL encrypted, secure entry point into the company using any emulation product on the market.

In addition to simplified access to a companies computing resources SAMS provides robust HIPAA and SOX compliance features that will help companies reach their compliance goals. “Regulations force companies to show who accessed their systems and why they were there” said Bill Redinger Vice President of Sales and Marketing for I/O Concepts. “The SAMS product gives companies the ability to immediately produce reports with that information and brings companies much closer to compliance without a lot of hassle.”

The Secure Access Management System is available now and pricing is dependant on the configuration of the organizations computing environment.

About I/O Concepts

I/O Concepts, Inc. is an employee-owned corporation located is Bellevue, Washington and has been providing enterprise-computing solutions since 1989. It has a rich history of delivering solutions that assist customers with their goals of reducing overall computing and operational costs while enhancing organizational productivity.
